QF5-10 Jenoptik Environmental Policy Statement

JENOPTIK Traffic Solutions UK develops solutions using technology to provide speed enforcement, urban traffic management, traffic offence detection, journey time information and delay advice; Jenoptik's ITS systems are designed to support the best use of the traffic network, reducing vehicle based CO² emissions.

It is our policy to take all practical steps to reduce our environmental impact and prevent pollution of the environment, whilst conserving resources. This is in addition to our obligation and responsibility to ensure we comply with all relevant legislative requirements for our environmental performance.

To achieve this we will examine all aspects of the business from initial sourcing of equipment and services through to eventual removal and disposition of equipment at the end of contracts. We will determine where renewable resources can be employed, where energy savings can be achieved and where waste reduction can be influenced, then work to introduce processes to carry this out.

In order to gauge our environmental performance we have set objectives for reducing our impacts and we measure progress against them in order to assess our effectiveness in achieving improvement. Our systems are subject to third party scrutiny and have been developed to meet the ISO 14001 2015 standard.

Protection of the environment in which we live and operate is part of Jenoptik values and principles, and we consider it to be sound business practice. Care for the environment is one of our key responsibilities and an important part of the way in which we do business.

In this policy statement, we commit our company to:

- Complying with all relevant environmental legislation, regulations and approved codes of practice.
- Protecting the environment by striving to prevent and minimise our contribution to pollution of land, air, and water.
- Seeking to keep wastage to a minimum and maximise the efficient use of materials and resources.
- Managing and disposing of all waste in a responsible manner.
- Training staff so that we all work in accordance with this policy and within an environmentally aware culture.
- Regularly communication our environmental performance to our employees and other significant stakeholders.
- Developing our management processes to ensure the environmental factors are considered during planning and implementation.
- Monitoring and continuously improving our environmental performance.

This statement of Company Policy is displayed prominently in all Jenoptik facilities, made available on the company file server and shall be review annually to reflect any changes in legislation. The management team endorses this policy statement and is fully committed to its implementation.
